1984 Rochester Forth Applications Conference

With a Focus on Real-Time Systems

June 6-9, 1984

University of Rochester

Rochester, New York

The fourth annual Rochester Forth Applications Conference will be held at the University of Rochester and will be sponsored by the Institute for Applied Forth Research, Inc. The theme of this year's Conference is real-time systems, which includes such areas as process control, data acquisition, smart instrumentation, laboratory systems, robotics, computer vision, spacecraft navigation, music synthesis and voice recognition.

There is a call for papers on the following topics:

1. Real-time software.
2. Forth applications, including, but not limited to: real time, business, medical, space-based, laboratory and personal systems; and Forth microchip applications.
3. Forth technology, including finite state machines, control and data structures, and hybrid hardware/software systems.

Papers will be handled in either oral or poster sessions, although oral papers will be reviewed for conference direction and paper suitability. Please submit a 200 word abstract by April 1st, 1984. Papers must be received by May 1st, 1984.
